

**CARTRIDGE HEATER
WITH 2 DIFFERENTIATED ZONES
AND CONDUIT
XLZ2-P**

Cartridge Heater Model XLZ2-P, consisting of a single section with 2 differentiated zones and equipped with a conduit and 90° cable exit. The body can be manufactured from various types of steel, depending on the application. Two cables exit from the same side. All heaters are equipped with an additional silicone sleeve approximately 80 mm long, with a diameter suitable for the power cable, to protect the cable exit area from the heater. Sealing is defined according to the application and the specific characteristics of the heat
